Quality • Community • Sustainability

Established in 1980, BAB Aluminium Pty Ltd is a proudly Australian-owned and family-operated manufacturer based in Southwest Sydney. For more than 46 years, we have been designing and manufacturing premium aluminium infrastructure for schools, sporting organisations, councils, architects, government departments, universities and community spaces throughout Australia and internationally.

Proud members of the Australian Made Campaign for over 40 years, we have remained committed to supporting Australian manufacturing, Australian jobs and Australian communities. Every product is proudly Australian Made, manufactured using Australian aluminium and built to meet the highest standards of quality, safety and durability.

Our reputation has been built on delivering products that combine exceptional quality, long-term durability and outstanding value. From seating, tables and bag racks to grandstands, tree seats, choir risers, Buddy Benches and inclusive playground infrastructure, every product is engineered to provide decades of reliable service in Australia's demanding outdoor environments.

Today, BAB Aluminium is the parent company of three recognised Australian brands:

- **BAB Aluminium** – Premium aluminium infrastructure for education, commercial and community environments.
- **Grandstands Australia** – Australia's leading manufacturer of engineered aluminium grandstands and spectator seating.
- **Buddy Bench Australia** – Creating safer, more inclusive school communities through products that encourage friendship, wellbeing and social connection.

Built to Last

Longevity has always been one of our greatest sustainability achievements.

Every product is designed and manufactured using premium Australian aluminium and engineered for strength, safety and low maintenance. Unlike timber or steel, aluminium will not rust, rot, crack or splinter, making it the ideal material for public infrastructure.

Our products are backed by:

- 20-year structural warranty
- 50+ year design life expectancy
- Fully engineered structural certification
- Cyclone-rated designs
- Compliance with relevant Australian Standards
- Proudly Australian Made
- Over 40 years supporting the Australian Made Campaign

When customers invest in BAB Aluminium products, they are investing in infrastructure designed to serve communities for generations while minimising maintenance and whole-of-life costs.

Sustainability with Purpose

Sustainability is embedded throughout our manufacturing process—it is not simply a statement; it is the way we do business.

BAB Aluminium is proud to partner with Capral Aluminium and manufacture using LocAl® Super Green low-carbon aluminium, reducing embodied carbon by approximately 67% compared with conventional aluminium.

Our commitment to sustainable manufacturing includes:

- 100% Australian-sourced aluminium extrusions
- 100% recyclable aluminium products
- Recycling every aluminium manufacturing offcut
- Reusing incoming timber, cardboard, plastic and paper packaging
- Using recycled packaging materials wherever possible
- Designing products with a service life exceeding 50 years, significantly reducing waste and replacement over time

Our commitment extends beyond environmental responsibility. We are proud members of the Aluminium Stewardship Initiative (ASI) and SEDEX, demonstrating our dedication to ethical sourcing, responsible manufacturing, environmental stewardship and continuous improvement.

Supporting Australian Communities

Community has always been at the heart of our business.

Every product we manufacture is designed to improve the places where Australians learn, play, gather and connect.

Through **Buddy Bench Australia**, we help schools create welcoming environments that encourage inclusion, friendship and student wellbeing, supporting children to build confidence and meaningful social connections.

We are also proud supporters of organisations including:

- Dolly's Dream
- Care Flight
- Canteen
- Beyond Blue
- The Salvation Army

Supporting people extends beyond charitable giving. Through our partnership with Nova Employment, we have proudly provided employment opportunities that help individuals develop valuable skills and establish rewarding careers in Australian manufacturing.

Our Promise

For more than four decades, BAB Aluminium has remained a family business guided by a simple philosophy:

- Put people first.
- Manufacture products that last.
- Support Australian manufacturing.
- Operate responsibly and sustainably.
- Leave every community better than we found it.

These principles continue to guide every decision we make.

We believe the true measure of quality is not what leaves our factory today, but how well it continues to serve Australian communities decades into the future.
